While the Africure Group was only created in 2017, the business of Africure was created out of a management buy-out of the African business of an Indian Multi National – Strides Group, which ran the African business for many years, under the leadership of same Africure Management team.

Further, Africure operates 5 other certified manufacturing plants across several jurisdictions namely India, Ethiopia, Cote D'Ivoire, Tanzania, Botswana and has set up distribution companies in Tanzania, Nigeria, Burkina Faso and Cameroon. Its medium-term objective is to increase its local production capacity in key markets of SSA, with a focus on markets with few or no production units and position itself as an early entrant with a niche manufacturing technology. Aside these, the Company also has distributors spread across SSA, to distribute its products in over 15 other countries.

Africure is committed to the health of Africans and hence has set up state of the art manufacturing facilities in key geographies of Africa. The Company's Plants are cGMP (Current Good Manufacturing Practice) compliant and manufacture formulations to the exact standards of the respective pharmacopoeias.

The Company's quality management systems are designed to ensure that the products are manufactured in a uniform and standardized manner and that the entire manufacturing process is SOP driven and under continuous oversight of quality assurance/quality control in order to ensure that the expected outcomes are achieved with minimal deviations.

Africure strongly believes that local manufacturing is the future of pharmaceuticals in Africa and that the Company is taking right strategic steps in this endeavor.

Africure has emerged as a dynamic pharmaceutical company committed to African healthcare. The demand by African countries to be self-sufficient in health care has provided Africure with an impetus to continuously expand in the manufacturing space and create high standard, large capacity assets. After learning of its success story, many Government Health Agencies are inviting Africure to set up country specific manufacturing capabilities and hence there are extraordinary growth opportunities for the Company and the Africure group will continue to relentlessly work towards its vision of manufacturing high quality essential medication in Africa by Africans for Africa.

7.2 Financial and Business Prospects

Performance Summary

The Group achieved a revenue of USD 26.80 million with an operational EBITDA of USD 4.10 million. Revenue declined by 26% compared to the previous year due to a general slowdown in formulation offtake in various markets and working capital challenges resulting from longer credit cycles on government contracts. Despite having a strong order book, execution has been slower than ideal.

The Group's revenues were significantly impacted by a fire accident at the Cameroon facility, which halted operations for approximately ten months. However, the facility has since been revived and is now stronger than before. The Group made strategic capital allocation decisions, prioritizing more profitable products, markets, and businesses, which improved margins from 36% to 41%.

The Group's profitable branded business saw substantial growth due to robust marketing and brand-building efforts. The Botswana business, historically a smaller part of the overall operations, gained significant traction with two large tenders awarded to the Group, to be serviced over three years. These and other orders in key markets have ensured a healthy order book for the next financial year.

Market & Company overview

The Sub-Saharan generic pharmaceutical market is expected to grow at 10% year-on-year, outpacing the rest of the world. This presents abundant opportunities, especially given the region's dependency on imports. Africure's strategy of "In Africa, By Africans, For Africa" aligns well with the increasing demand for affordable generics. African governments are emphasizing capacity creation and supporting local manufacturers, creating a favorable business environment for Africure.

The Group's focus on the Rx promotion business, better pricing strategies, and sharp procurement practices have ensured that we remain ahead of margin expectations. We are on the right path to creating value for our stakeholders by establishing the largest local ODF manufacturing capacities in Sub-Saharan Africa. Additionally, the company has definitive plans to expand into other innovative dosage forms in the near future.

We have received substantial support from local governments through policy changes favoring local manufacturers and large orders signifying a shift towards greater public-private partnerships in the healthcare sector. The Group has developed a robust portfolio of products across all companies, with over 130 products registered and plans to file an additional 70 products in the coming year, alongside various in-licensing arrangements.

Some ongoing highlights include:

- The business has completed six years of operations in April 2022, with an impressive revenue & EBIDTA CAGR of 27%
- Tough market conditions with low liquidity, reduced stock holding at various supply chain levels & price driven competition has caused lowerthan-expected revenues from private markets, resulting in a flat revenue over the previous year.
- However, the Group has remained resilient, and through its experienced sales teams, has been able to procure orders from governments, to compensate for the lost sales in the private segment.
- The gross & EBIDTA margins have been improving year-on-year, highlighting the results of the Group's market/product selection & efficiency improvement initiatives
- The Group received a funding of USD 7 Mn (Of the committed 15 Mn) from Blue Peak holdings, an impact-based PE fund from Tunisia. These funds have been used to fund the incremental working capital that was required to execute the government orders, these have a relatively longer working capital cycle & in building up of inventories.
- The Group believes that the tough market conditions are set to remain & the focus will be to ensure capacity utilization and improve efficiencies in manufacturing, sales & working capital management
- Our Ethiopian plant is now complete, with the licensing process currently underway. We expect commercialization of the facility by September 2023.

- The Group is mindful of various ESG responsibilities & is working on various impact creating initiatives

We believe in the opportunities that exist in the markets we serve and are constantly working on capacity building to enhance our production volumes & resultant revenues. The Group has a strong orderbook for next two guarters, with a few long-term contracts as well

As a manufacturing focused company, we understand that the gestation & payback period is longer and that we are creating value through these capacities for years to come.

- The business has completed five years of operations in April 2022, with an impressive revenue & EBIDTA CAGR of 25%.
- The Group has completed the acquisition of majority stake of a manufacturing company in Tanzania. An official announcement has been made in Q4, to this effect. This will add to margin growth, as evident in these results.
- The Group has tied up debt funding of USD 15 Mn from BluePeak Private Capital, an impact-based PE fund from Tunisia.
- The gross & EBIDTA margins have been improving year-on-year, showing the results of the Group's product selection & efficiency improvement initiatives.
- Increased freight costs & volatility in raw material pricing has continued to impact business margins, which we expect to be the new normal. This has necessitated us to right-size our inventories & reduce our reaction time to market.

We believe in the opportunities that exist in the markets we serve &

are constantly working on capacity building to enhance our production volumes & resultant revenues. Slow market environment & delays in tender and ordering processes in various geographies have led to revenue short falls in some business segments. We see this as a temporary phenomenon which will correct in the next quarters. There has been continuous growth in our Rx promotion business and brand development efforts, with ~15% of our revenues emanating from these businesses.

Our R&D pipeline is trending very positively with more than 100 products being ready for filing in various geographies across Africa. Finally, and of note, we have successfully completed our planned Quality & ESG compliance initiatives & audits in line with our commitment to maintain high standards of quality and compliance.

HIGHLIGHTS OF PERFORMANCE

- The Group has achieved +100% of its budgeted revenue & profitability estimates for the financial year 2021-22.
- Annual revenue of ~USD 35.00 Mn against USD 29.00 Mn achieved in the last year, signifying a 20% YoY growth. Our businesses in French west Africa & East Africa have grown over the group's growth rates.

- Operational EBIDTA at USD 4.70 Mn against USD 3.70 Mn achieved in the previous year, a 27% annual growth.
- Profit after tax at USD 1.30 Mn against USD 965K in the previous year, a 35% growth.
- Receivables at 160 days against 125 days in the previous year, driven by high sales in last 4 months of the year & delay in realization of certain government receivables.
- Inventory holding at 112 days against 90 days in the previous year,

- getting closer to a much needed 120-150 days inventory holding. ~USD 1.25 Mn invested on Capex in the period with a further
- commitment of up to USD 2 Mn in the next year. With newly acquired productive assets, depreciation costs have increased.
- Debt Equity ratio at 0.67 against 1.12 in the previous year, signifying a better leverage position.
- The board has not declared any dividend for the period and continues to reinvest profits to maintain growth momentum.

CURRENT BUSINESS OUTLOOK

The Group has a positive outlook across all its businesses, and expects continued and consistent growth. Further working capital infusion that is planned will increase our ability to increase our inventory holdings and better respond to market needs. The Group expects a revenue of ~USD 40 Mn in the coming year, with increased margins. We believe that the Group's ability to adapt & respond to changing market dynamics, has helped to create a robust business model that will enrich value for all its stakeholders. The acquisition of the Tanzanian business and the ramp up in Ivory Coast manufacturing, alongside the start of Ethiopian operations, will greatly enhance the Group's growth.

We sincerely thank all our employees, customers, investors & other stakeholders for their continued patronage and support during these testing times & reiterate the management's commitment to consistent performance and strong governance, with a view to create value in line with our long-term vision. We will continue to work towards increasing local manufacturing capacities in Sub Saharan Africa & help Africa reduce dependence on imports, thus enabling a greater level of self-sufficiency in pharmaceutical manufacturing and services.

ABRIDGED UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

FOR THE THREE MONTHS ENDED 30th JUNE 2024

DIRECTORS COMMENTARY AND GROUP OVERVIEW

The Board of Directors of Africure is pleased to present the unaudited results for the first quarter, being for the period ended 30th June 2024.

Africure is a manufacturer of high-quality essential medication, with a differentiated strategy to create manufacturing assets & capabilities in Africa, for the betterment of the health of Africans. We operate manufacturing plants in Cote d'Ivoire, Cameroon, Botswana, Tanzania and India, besides having distribution companies in various countries across Sub Saharan Africa, together with key partnerships with various pharma companies in Africa.

Some ongoing highlights include,

- Q1 for the financial year 24/25 performance was short of expectations, with flat YoY revenues and lower profitability. The budgeted numbers could not be met due to a delay in the expected cash infusion into the business towards working capital.
- There has been a drop in input material prices by 20-25% compared to last year, which has impacted the topline, despite 10-15% growth in terms of volumes.
- The Group achieved revenue of USD 6.45 Mn with an EBITDA of USD 534k, against previous year's quarter revenue of USD 6.57Mn &EBIDTA of USD 775k

In addition, the Group completed the construction of the Africure Pharmaceuticals Manufacturing Plc, Ethiopia despite challenges for 2 years caused by COVID. The Ministry of Health has given permission to market 40 products which are essential medicines and has expressed initial positive response to provide a tender award.

We currently have a robust order book in Botswana, Tanzania, IVC that will support us in achieving the expected revenue.

There has been promising growth seen in our Rx promotion business and brand development strategies.

Our R&D pipeline is trending very positively with more than 100 products being ready for filing in various geographies of Africa.

HIGHLIGHTS OF PERFORMANCE

- The Group has achieved 80% of its budgeted revenue & 52% of profitability estimates for Q1 June 2024-2025.
- Gross Margins at 40%, signifying our ability to manage cost increases & improve the product mix.
- Quarterly Operational EBIDTA at USD 535k against USD 775k achieved in the previous year. The decrease is explained by the dip in revenue
- Increase in loss after tax owing to higher depreciation and finance costs

- Working capital cycle (WCC) of 229 Days. The WCC is relatively high due to elevated creditor levels, which need to be reduced to enable further procurement seamlessly.
- Debt Equity ratio at 1.39:1, against a similar ratio in the previous year.
- The Board has not declared any dividend for the period and continues to reinvest profits to maintain growth momentum.

CURRENT BUSINESS OUTLOOK

The Company has a strong orderbook for Q2 and expects to achieve a revenue of ~USD 7.50 Mn in the next guarter & remains in line to close the annual revenue between USD 34Mn to USD 36Mn. We believe that the group's ability to positively adapt & respond to market forces, has helped to create a robust business model that will enrich value for all its stakeholders.

We sincerely thank all our employees, customers, investors & other stakeholders for their continued patronage and support during such testing times & reiterate the management's commitment to consistent performance and strong governance, with a view to create value in line with our long-term vision. We will continue to work towards increasing local manufacturing capacities in Sub Saharan Africa & help Africa reduce dependence on imports, thus enabling a greater level of self-sufficiency in pharmaceutical manufacturing and services.
