Comments on Results

Group Performance for the quarter ended 30 September 2024

Velogic Group delivered robust top-line growth, with revenue increasing by 31% to MUR 1,111 m (Q1 FY 24: MUR 846 m), driven mainly by Cross-Border Logistics in Mauritius. EBITDA rose by 6% to MUR 157 m (Q1 FY 24: MUR 149 m), while Profit After Tax registered a 3% increase to MUR 71 m despite significant unexpected cost increases in Mauritius.

Highlights by Geography

Mauritius

Revenue from operations improved by 44% to MUR 624 m. However, Profit After Tax fell short of last year, impacted by higher costs of operations and the introduction of the Corporate Climate Responsibility Levy.

Cross-Border Logistics segment delivered strong revenue growth, driven by, the integration of MC Easy Freight Co Ltd, acquired recently and increased volumes in both air and sea shipments. However, profitability dipped on the back of higher statutory wage increase, depreciation, tax and finance costs.

Landside Logistics' revenue grew by 5%, supported by warehousing and depot activities, which benefited from higher storage volumes, more containers handled and the sale of empty containers. This largely offsets the shortfall in haulage revenue attributed to reduced transportation of sugarcane and coal during the quarter. Despite revenue growth, profitability dropped by 18% due to higher personnel costs and right of use amortization and financial costs.

Sugar packing operations posted solid gains in both revenue and profitability on the back of higher prices, increased volumes, better product mix, coupled with favorable exchange rate. Shipping revenue increased, thanks to more surveys carried out. However, profitability declined due to increase in personnel costs.

Overseas

Revenue rose by 18% to MUR 487 m (Q1 FY 24: MUR 413 m), while Profit After Tax grew by 10%, reaching MUR 26 m.

In Kenya, revenue grew by 26%, fueled by an increase in both longer trips and higher selling prices. Operating profit climbed by 24%, reflecting strong business performance, in contrast, the bottom line suffered from higher foreign exchange losses and higher tax charge.

Revenue in India increased by 46%, driven by higher air shipment volumes. However, profitability for the quarter was impacted by lower gross margins as the market remained extremely competitive.

In Madagascar, both revenue and profitability showed marginal growth, supported by improved air shipment volumes.

The positive trend observed towards the end of the previous financial year in Reunion continued this quarter. Revenue rose by 4%, while profitability surged by 50%, fueled by improved margin on express courier operations and delivery services.

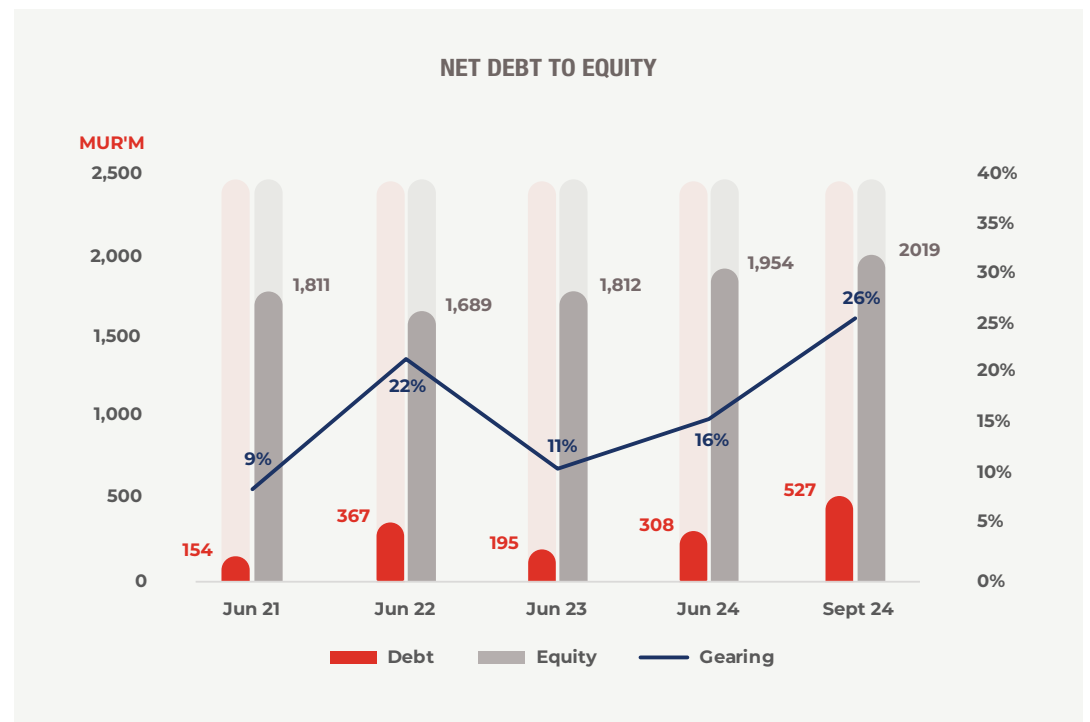

Our newly established operations in Tanzania reported a minor loss for the quarter as expected and we remain focused on building scale and driving growth.

Outlook

The positive trends observed in revenue in the first quarter are expected to continue, however, known cost increases will adversely impact profit margins.

By order of the Board
